# Barbell Economy Portfolios® Cumulative Snapshot Thru Q4 2023

## Barbell Growth Portfolio Thru Q4 2023

### Barbell Economy Growth Portfolio

The Portfolio puts less weight on current dividend income and instead places more focus on companies which management feels are expanding within the economic channels defined by the Barbell Economy and unfolding demographic trends. Given a higher focus on perceived future growth characteristics, all investors can expect a greater range of volatility during difficult or strained market conditions. The portfolio consists of companies with growth objectives and/or strategies we feel are within the expected channels of expansion as the generations which weigh heavily on the Barbell effect in the US economy age into the years ahead. It remains our view that as the 2020s and 2030s unfold, growth is set to continue to surprise to the upside, even as markets are compressed during normal, expected setback windows of time ahead.

**DISCLOSURES:** The above referenced summaries are gross of fees as each particular advisor may choose a different fee range for their clientele. As such, any investor using these portfolios must also assume an additional cost will be added and the net results shown will indeed have differed. Typically, that cost will range from between 0.75% to 1.75% depending on account sizes and the financial services rendered. Finally, it is also important to recognize that the years 2012 - 2021 results encompass periods when management used the portfolios for in-house clientele as well as offered the portfolios to other advisors for use with their clientele through a consulting offering. Hence, it is highly likely that varying results were reached by different parties where management was not in control of the trading or advisory service for a particular client. Past performance is not a guarantee of any future results. Please consult your advisor before making any investment decisions. Nothing herein is ever intended to be investment advice. Reference to any specific securities does not constitute an offer to buy or sell securities in any jurisdiction. All public data received from what are expected to be reliable sources. Truvestments Capital, LLC is not responsible for any damages or losses arising from any use of this information. ### Barbell Economy Tech Portfolio

Generation Y is the most technologically advanced generation to ever inhabit the planet. The impact their technological provess will have on our lives will redefine the word change. And when we say change – we mean change in ways that cannot be comprehended or defined effectively today. The tech world will bring tools, cloud channels, deep software and gadgets to us at light speed – all of which will make life easier, more efficient, closer. The power of Generation Y, their record size and the powder keg of technology they have grown up on and are creating daily, is collectively set to power all of us into a reality which will shock our senses. The price? A demand for patience and discipline - and acceptance of more volatile positions and a portfolio which will likely change more often due to buyouts and/or replacements.

### **Barbell Dividend Income Portfolio Thru Q4 2023**

### Barbell Economy Dividend Income Portfolio

This Portfolio focuses on companies with a long-term history of consistent annual dividend growth. Underlying that quantitative process, we focus on companies we feel are "in the way" of coming waves of demand as the next generation takes control of the US economy – using the same benefits of the Barbell Economy. History shows dividends play a positive role in returns over long periods of time for patient investors. It is important to note also the general "character" activity a dividend portfolio tends to exhibit. During times of difficult market action to the downside, dividends tend to fall less. Think of it as a shock absorber effect. On the other hand, when markets are in a general growth mode, you will see that dividend portfolios tend to lag a bit behind the general market. The focus over time? Expanding annual dividend income. Note also that as Technology brings greater benefit to expanding areas of our lives, the Barbell Dividend Portfolio will struggle to "beat" the S&P 500 due to its extraordinary technology market weighting. For example, at the time of this posting, Apple and Microsoft alone now comprise over 14% of the S&P 500. Hence, we have provided comparisons to S&P 500 market-weight, equal-weight and dividend ETF results for all to review.

### **Barbell Small Account Portfolio Thru Q4 2023**

### Barbell Economy Small Account Portfolio

The small account portfolio provides for a client response solution for accounts which stand at \$150,000 or lower (client choice). This portfolio still builds around the demand base of the Barbell Economy® and its expansion channels. The goal was to provide for multi-cap exposure for clients beginning with smaller balances. Generation Y is the most technologically advanced generation to ever inhabit the planet. The impact their technological provess will have on our lives will redefine the word change. And when we say change – we mean change in ways that cannot be comprehended or defined effectively today. The issue? It's a bit more difficult to provide a comparable index, so we have included a broad market index (NYSE), a large cap index (RSP) and a small cap index (IWM) for transparency and full perspective.

DISCLOSURES: These summaries are gross of fees as every advisor may choose a different fee for their clientele. Any investor using these portfolios must also assume an additional cost will be added and net results will differ. Typically, that cost ranges from 0.75% to 1.75% depending on account size and the services rendered. Finally, these results cover periods when management researched the portfolio in-house only with a start date of June 1, 2017. It was offered for portfolio use as of 6/30/2019 to clients and other advisors for use with their clientele. It is highly likely that varying results were reached by outside parties where management was not in control of the trading or advisory service for a particular client. Past performance is never a guarantee of any future results. Please consult your advisor before making any investment decisions. Nothing in this material is intended to be investment advice. Reference to any specific security does not constitute an offer to buy or sell securities in any jurisdiction. All public data received from what are expected to be reliable sources. Truvestments Capital, LLC is not responsible for any damages or losses arising from any use of this information. Fee-based investment advisory services are offered through Truvestments Capital, LLC, a SEC-registered investment advisor. All data through DECEMBER 31, 2023. Copyright 2024. All Rights Reserved.

## Barbell Biotech Portfolio Thru Q4 2023

### Barbell Economy Biotech Portfolio

Biotech is the chosen sector of the Baby Boomer end of the Barbell Economy, where data suggest powerful tech, medical and scientific forces are all converging to bring significant health benefits to all generations. The significance of those changes are set to be life-changing and can hold important value for the patient investor. Even so, it is vitally important that all investors using this particular portfolio understand that the volatility is surely higher than what many other portfolios have historically shown. This demands patience and discipline, along with a long-term horizon, permitting values to unfold over time while bringing life-changing treatments and services to patients needing such solutions around the world.
